

Extraordinary Parenting

A manual for parents of children between 0 – 12

Especially if they are sensitive or have a chronic physical, medical or emotional condition.

The author, Liz Bruce, will be familiar to many readers through her previous books, work with families (Block and Tackle™ groupwork), psychological practice, lecturing and conference presentations. In her own words she remarks, “This book represents many years of listening to parents and working with kids for whom the ordinary business of growing up has been, and is, an extraordinary experience.” As a parent, your task is similarly extraordinary.

40 sections present an overview of reality from a child’s point of view and then suggest a variety of tasks that parents can consider in the context of their own environment and circumstances. Each section includes a list of strategies aimed at the psychological protection of the child. There is no prescription for success. No one set of plans suits all. ***The aim is to embrace the unique qualities that each individual can ultimately offer to the world.*** Topics covered include Tuning in to your child, Awareness of body, Introducing a child to a condition, Dare to dream, Ownership of a condition, Toward autonomy and independence, Pain and medication, Resistance to medication or exercises; Fear, Anxiety, Avoiding depression.

Liz has chosen to call this work a manual. It is designed as a reference to be read as needed, in whatever sequence of sections is required.
